TECE offers a broad collection of exclusive flush plates for private and commercial properties. Made of glass, stainless steel and plastic, they fit all TECE cisterns, and installation frames.

New
TECEsquare Metal with matt black, anti-fingerprint coated surface.

TECElux Mini is an electronic glass flush plate with hands-free flush control. A sensor recognises when somebody approaches and the sensor lights up through the glass facing. Flushing is touch-free or by a light tap on the button area. The safety glass plate can stand proud or be fitted flush to the wall by using the installation sub-frame.

TECElux Mini

Programmable function features:

- Sensor range adjustment
- Auto hygiene flush
- Adjustable flush length
- Auto safe flush
- Display brightness adjustment

Hands-free activation

TECElux Mini flush plate with electronic, hands-free control

Electronic flush plate for TECE cisterns with front activation. Flat glass flush plate, including connections and motor. Suitable for flush-mounted installation. Compatible with insert chute for cleaning tablets. Dimensions: (W x H x D): 220 x 150 x 8 mm

- | | |
|---------------|-----------|
| 1 White glass | FP9240960 |
| 2 Black glass | FP9240961 |

Function of the electronics:

The flush button illuminates when the sensor detects someone approaching. A light-tap or hands-free activation will operate the flush mechanism. Functions can be customised via the remote control (Art Nr. FP9240971 - order separately).

Optional order separately:

- Installation sub-frame for flush-mounted installation of control plates

Accessories

TECElux Mini transformer incl. connection cable

Mains power supply.
Art Nr. FP9240970

TECElux Mini anti-theft device

Concealed fixings for anti-theft protection of TECElux Mini.

TECEloop in white

The polymer TECEloop flush plates are the same size and shape as TECEloop Glass and uses the same button actuation mechanism. An antibacterial version is particularly useful in hospitals, nursing homes as well as in other locations where hygiene is especially important. Silver particles contained in the mouldings reduce the ability for germs to multiply.

Good design doesn't have to be expensive.

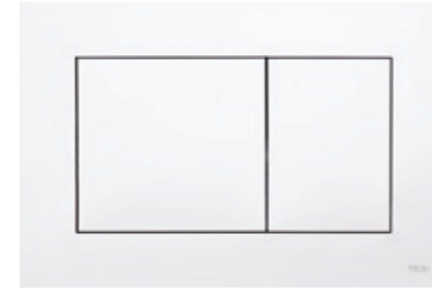

With a flat, thin and minimalist design, TECEnow proves that good design doesn't have to be expensive. This sleek and discrete flush plate suits all design briefs and budgets working with a tried-and-tested dual-flush mechanism.

TECEambia flush plates, with their single or dual-flush buttons, are a universal design standard. Their compact dimensions perfectly suit every bathroom design concept. Double-sided rubber buffers help reduce rattling noises to a minimum.

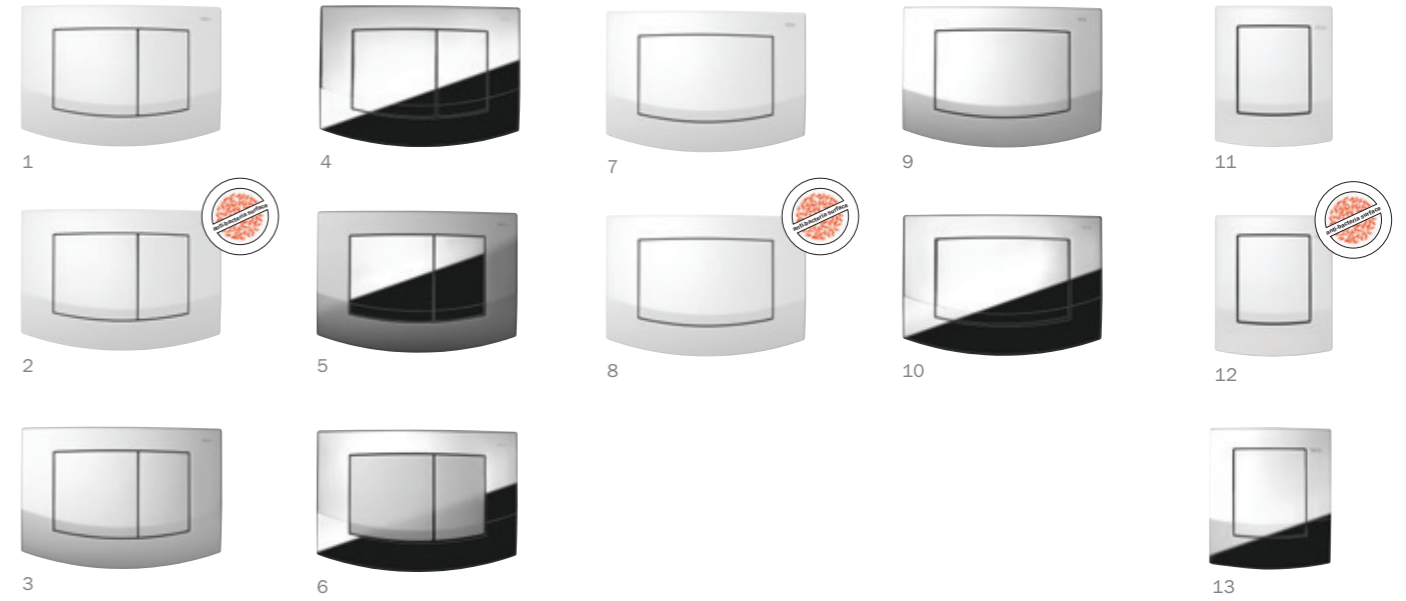

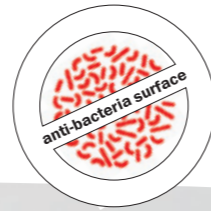

Due to the silver ions in the antibacterial version of TECEambia, growth of germs on the control surface is significantly inhibited – ideal for public sanitary areas.

TECEambia white

With a timeless design and a large selection of finishes, TECEambia flush plates are at home in all bathrooms. The antibacterial version is ideal for use in hospitals and nursing homes or other locations where hygiene is especially important.

Silver particles contained in the raw material reduces the ability of germs to multiply, resulting in a more hygienic control surface.

Hygiene perfection: Hands-free flush actuation for WC or urinal.

WC electronic control

TECEplanus electronic controls have an infrared sensor to provide a hands-free automatic flush. Sensing both standing or seated users, a manual override is also possible should the power supply fail. Power options include battery or main electricity.

- Power options are a 6 V battery or an external 230 V/12 V power supply unit
- Actuation control via an IR sensor, radio or cable
- IR sensor with hygienic flush function

TECEplanus IR flush control for urinals

As well as the standard range, the autofocus sensor also measures the light reflected from a user. The flush operates independently of the colour of the user's clothing, as the recognition area is scanned separately from the background. The simple control system offers a number of custom programming options. In the mains power version, the transformer is installed in a conventional flush-mounted switch instead of the valve housing.

TECE urinal flush plates with flush valve technology from TECE

- Same flush valve housing for the installation of manually and electronically actuated cartridges
- Different flush volumes can be set
- Piston seal made of plastic
- One universal module for electronic and manual actuation
- Cartridge and electronics are easily installed despite of the flush plates modest size

Urinal and toilet installation sub-frames for flush mounting of the TECElux Mini, TECESquare Glass, TECEloop Glass and TECEnow flush plates.

Toilet installation sub-frame

Depth-adjustable for wall coverings from 5 to 18 mm (up to 36 mm with upgrade set). The various frame colours make it possible to individually match a flush plate or wall.

White	FP9240646
Black	FP9240647
Gold-plated	FP9240648
Bright chrome	FP9240649
Metal (for own plating)	FP9240644

Decorative toilet frame for toilet installation sub-frame

Metal decorative frame for combination with toilet installation sub-frame. Used to cover uneven tile edges. Depth-adjustable decorative frame for wall coverings from 5 to 18 mm (from 18 to 33 mm with adjustment bolt 9820181).

Bright	FP9240645
Brushed	FP9240643

Urinal installation sub-frame

Depth-adjustable installation sub-frame for wall coverings from 5 to 18 mm (up to 36 mm with upgrade set).

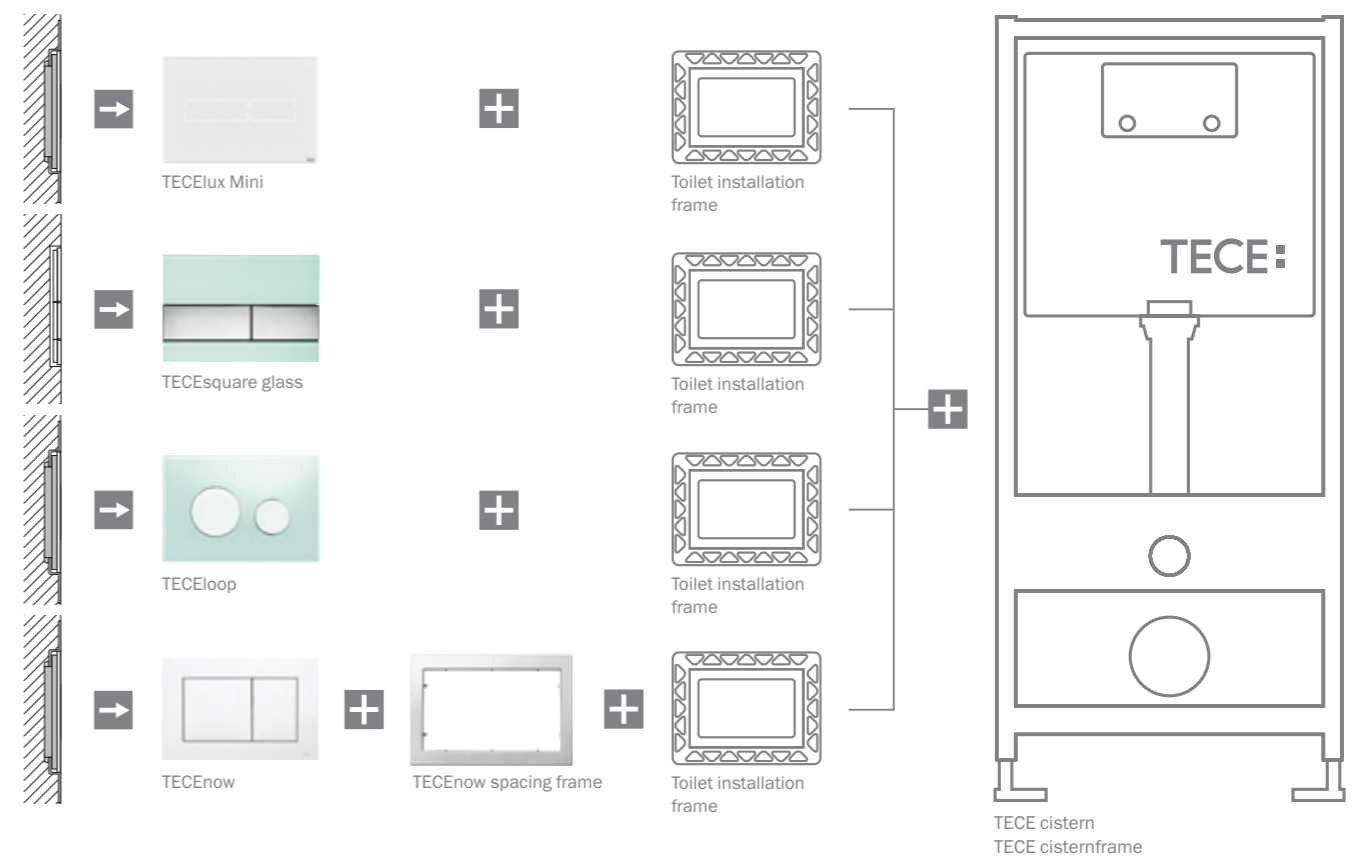

Caution: For dry-wall construction only.

White	FP9242646
Black	FP9242647
Gold-plated	FP9242648
Bright chrome	FP9242649

Flush-mounted installation sub-frame

TECElux mini, TECEnow, TECEloop and TECESquare glass flush plates, can be flush-mounted with an installation sub-frame to produce a smooth and easy to clean surface.

Using the installation sub-frame is easy and precise, and comes in a variety of colours for wall coverings from 5mm to 18 mm, or even 36 mm with an upgrade set.

The insert chute for cleaning tablets or blocks – automatic hygiene and freshness when you flush.

100% confidence
100% compatible
...flushing technology from **TECE.**

Just add hygiene

Cleaning tablets keep your toilet smelling fresh and stops limescale building up on the ceramic surface. Cages hanging from the rim or liquid toilet cleaners from a bottle are now a thing of the past. The insert chute is a real world solution, especially for rimless toilets.

Suitable for all TECE flush plates, this easy to use upgrade is a simple solution to a messy problem.

The insert chute is easy to use in just a few simple steps.

To remove the flush plate, simply grasp behind the plate, then pull and swivel the plate downwards.

The bold red flap covering the insert chute is now clearly visible ...

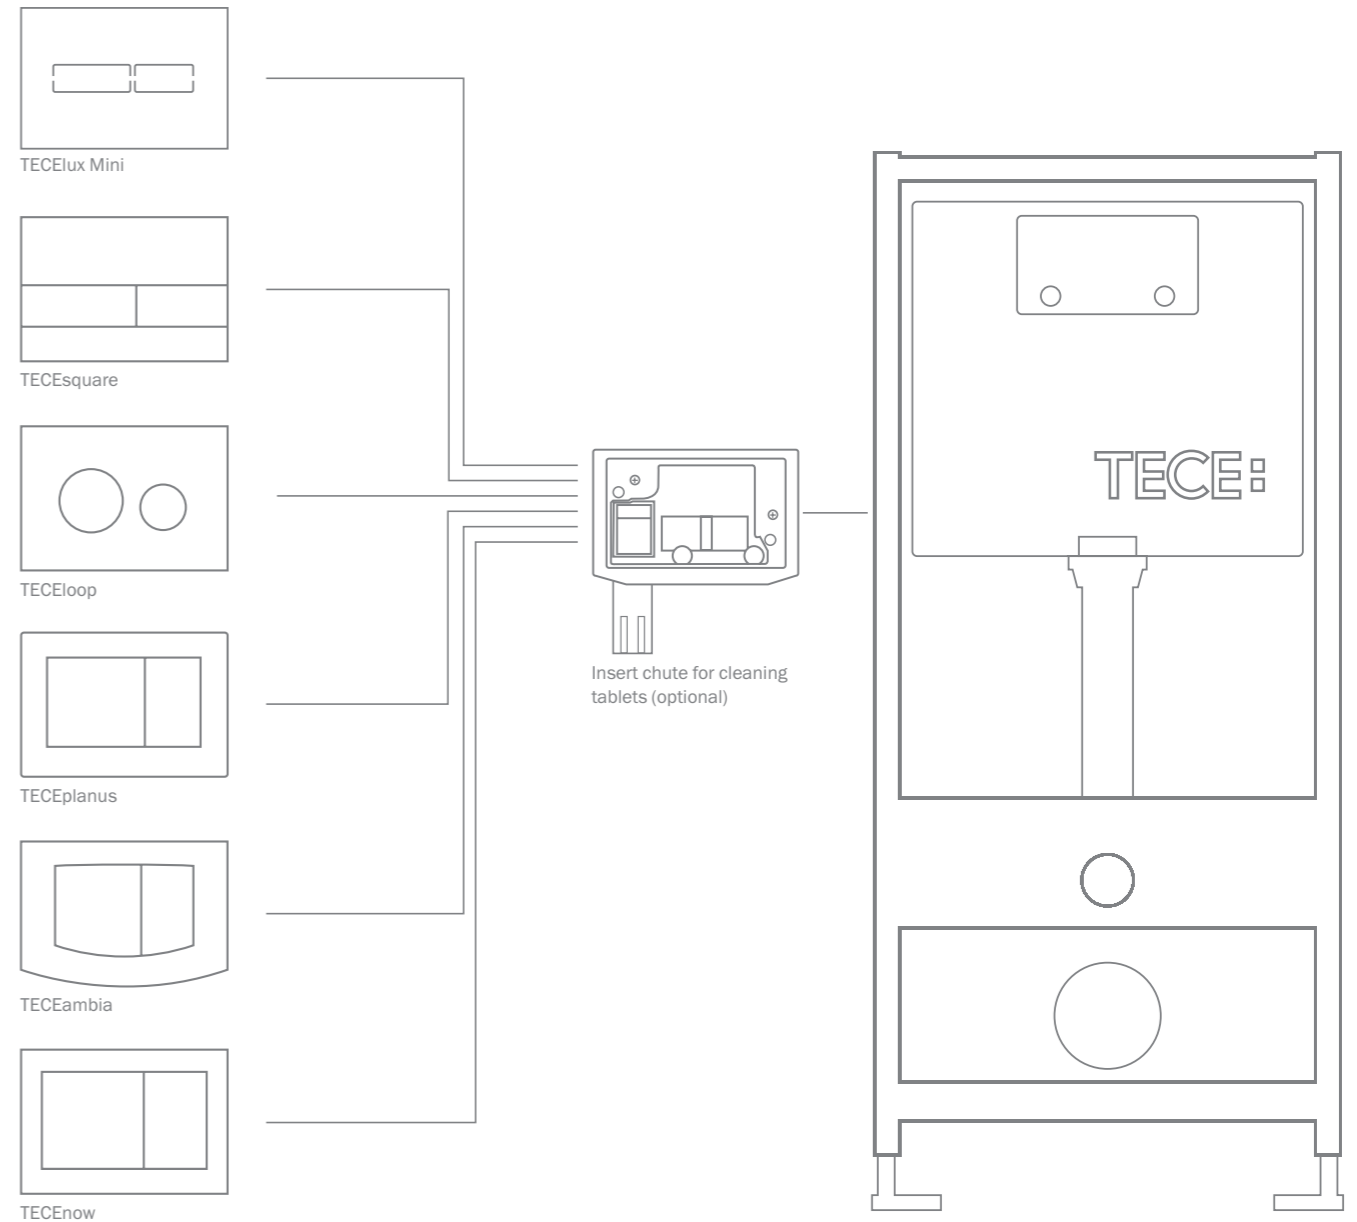

... and the tablet can be dropped down ...

... It falls into the collector basket inside the cistern, from where it releases its hygienic cleaning agents into the water.

For retrofitting to all TECE cisterns, suitable for all TECE flush plates

TECE is 100% compatible: Every flush plate fits every cistern and frame

All TECE flush plates fit all cisterns and frames, no matter which model. It is very easy to take this for granted, but some companies flush plates do not match all their cisterns. When the fitter says the flush plate doesn't work it's already too late, because the cistern is already installed in the wall.

Loved by designers, adored by fitters

Flushing technology with a system – made by **TECE**.
